Goose Al-Gus Investigation Report

Date of investigation: 21 June 2026

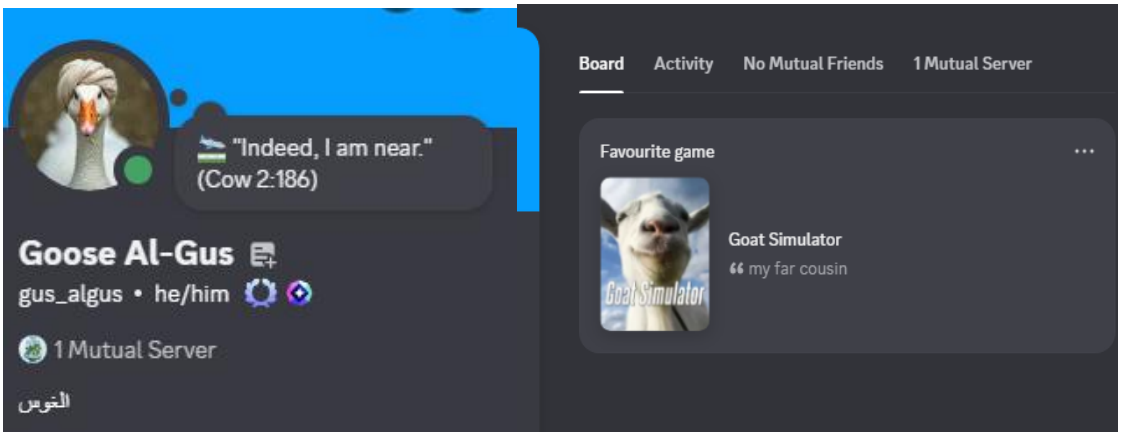

Investigator name: Ammaar Hayat

Report compiled: 03 July 2026

باسم الله الرحمان الرحيم

Timeline of notable events

16:15 Initial suspicions were raised by the investigator as a result of Goose Al-Gus' account appearing 'troll-like:'

16:16 Initial contact was made with Goose Al-Gus, he preferred "not to answer" having been asked by the investigator if he was someone's alt, insinuating that he *was* someone's alt, hence triggering further investigation.

The idea of Goose Al-Gus being someone's alt was furthered by:

- Goose Al-Gus acting casual with other members

- Goose Al-Gus' name was particularly ironic for the server, especially with

  geese being a recurring theme, insinuating he had prior knowledge

- at 16:24 Goose Al-Gus admitted to having heard about [redacted] who was a prior member, thereby confirming that he had previous knowledge of the server

16:22 Goose Al-Gus confirms that if his sleep schedule is tracked, we will know who he is, suggesting he has a unique time zone to others in the server as he sleeps at significantly different times.

16:42 The phrase “Malaysia looks like India” is said, not triggering Goose Al-Gus, Thereby reducing the chance that he lives in Malaysia

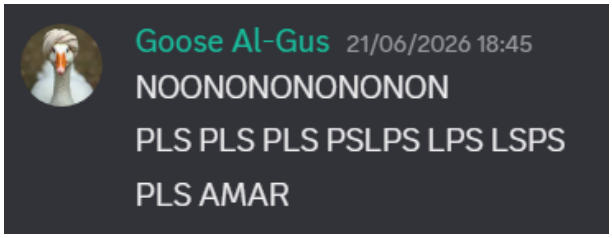

16:55 Goose Al-Gus sends a bait message saying “snowman marker” however deletes this AFTER he said “wait no im leaking my region” - the lack of panic and urgency here insinuates that it was bait:

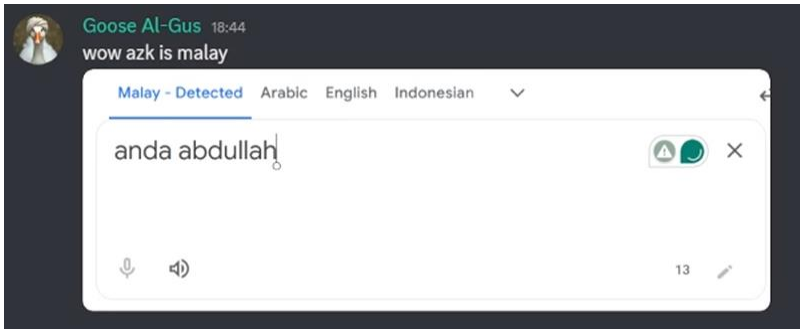

16:59 Goose Al-Gus capitalises “Allah” - he does not capitalise any other word

For the next 45 minutes, nothing notable was found and casual talk was initiated with Goose Al-Gus

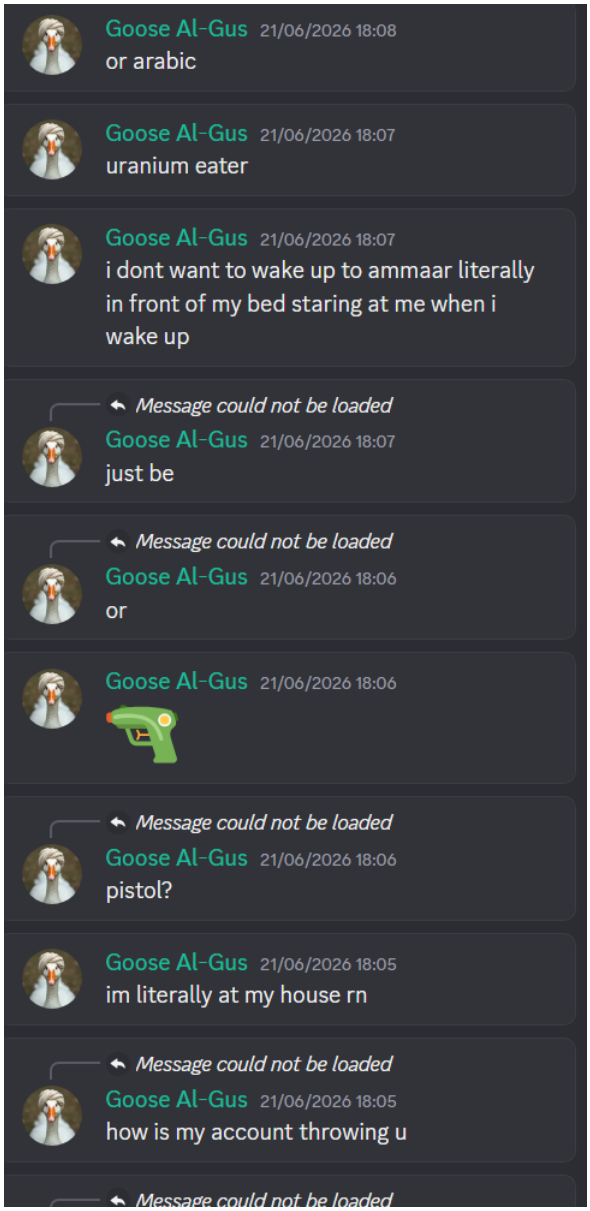

17:44 Goose Al-Gus sends a screenshot of his Google Translate. This instantly sends him into major panic mode – he spans “NO NONONONONONO” and “LA ILAHA AILLALLAH.” This is a vast contrast to what was seen earlier, suggesting this is some evidence of notability:

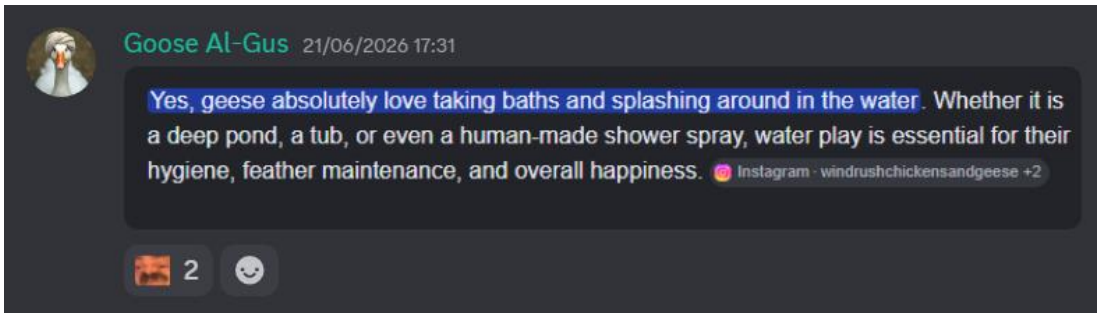

Collection of evidence

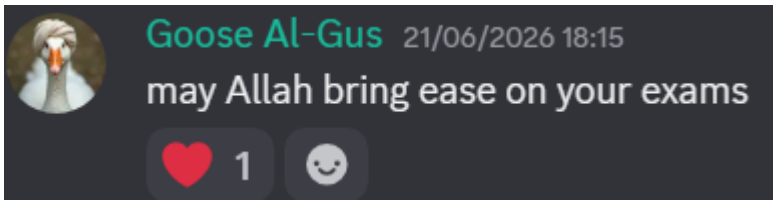

Goose Al-Gus continuously spoke in all lowercases:

Goose Al-Gus sent various screenshots, including PC interface:

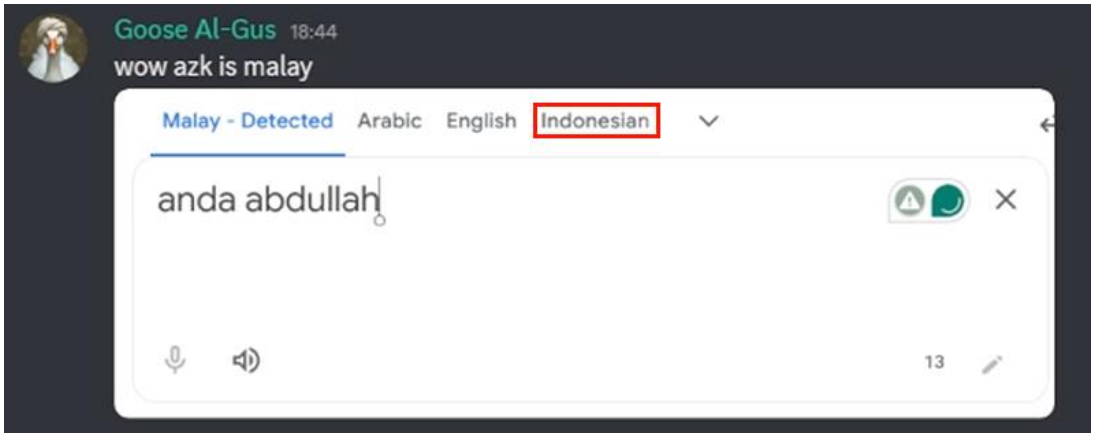

Goose Al-Gus continously capitalises the name “Allah”:

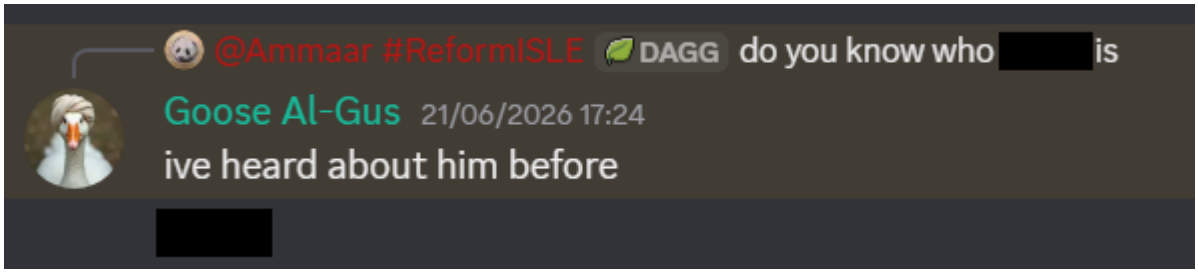

On the day, Ja’far was one of the very few members of the ‘Al-Gus tribe’

Goose Al-Gus provided a screenshot in which one of his recent languages on Google Translate was Indonesian:

Goose Al-Gus admitted to having known a former member of the server:

Goose Al-Gus consistently made edits quickly which did not seem to be uniform, suggesting the use of editing software rather than casual tools and therefore isinuating he is good with computers:

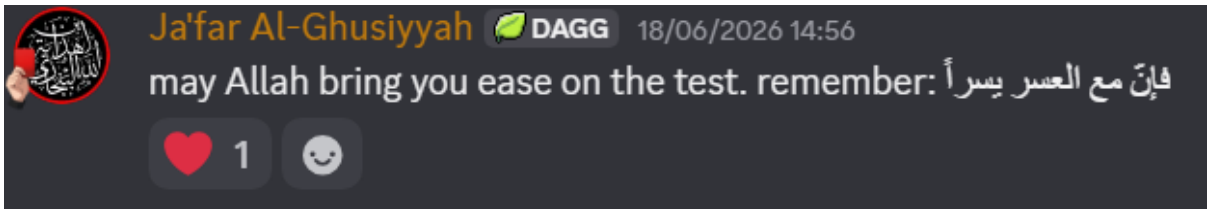

Analysis

The findings of Goose Al-Gus having Indonesian in his recent language on Google Translate almost confirmed that he was Indonesian. Furthermore, the earlier findings of him being a long-time member, this almost confirmed he was one of the known Indonesian members of the server: Ibn Shafi'i or Ja'far.

Ibn Shafi'i was almost immediately ruled out as he almost consistently capitalises the first letter at the start of his sentences. This was not a trait of Goose Al-Gus as seen above.

Confirmation of Goose Al-Gus being Ja'far follows

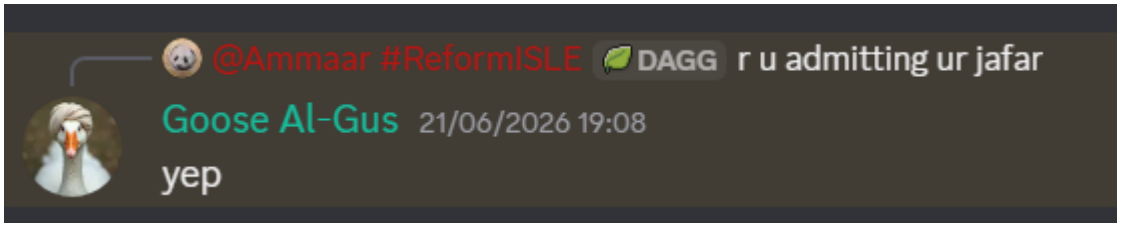

The above screenshot confirms that Ja'far capitalises the name "Allah" - similar to the traits of Goose Al-Gus. Furthermore, the use of the words "bring" and "ease" is similar to the wording of Goose Al-Gus when he wished well for the examinations of someone else earlier in the evidence collection.

At the time of the investigation, Ja'far had his GitHub in attached to his Discord profile. This insinuated that he was good with computers – similar to the trait of Goose Al-Gus.

Decision

Goose Al-Gus is the alt of Ja'far. This was confirmed by an admission of guilt:

Investigation concluded at 18:08
